Fund Investment **Information**

G Fund General Information

- The G Fund can be compared with 3-month marketable Treasury securities (T-bills).
- All investments in the G Fund earn interest at a statutory rate that is equal to the average of market yields on outstanding U.S. Treasury marketable securities having 4 or more years to maturity.
- The G Fund rate is set once a month by the U.S. Treasury, and all G Fund investments earn interest at that rate for the month.
- Low Risk

F,C,S & I Fund General Information

- The asset managers of the F, C, S, and I Funds are selected through a competitive bidding process.
- The Board has contracts with Barclays Global Investors (Barclays), a company owned by Barclays PLC, to manage F, C, S, and I Fund assets.
- Barclays is the largest investment manager of index funds in the United States, and has under management over \$800 billion in total assets

F,C,S & I Fund General Information

- The Barclays funds are not mutual funds and are not open to individual investors however they operate in a manner similar to mutual funds.
- Contributions to the F, C, S, and I Funds are invested in G Fund securities until the cash is transferred to the respective Barclays funds.
- Barclays index funds incur trading costs when they purchase or sell securities in the bond or stock markets. When trading costs are incurred, they either reduce the amount of the F, C, S, or I Fund contributions invested or they are charged to the related Barclays index fund (thereby reducing the share price of the fund).

F Fund General Information

- The F Fund must be invested in fixed-income securities and is invested in the Barclays U.S. Debt Index Fund, which invests in notes and bonds.
- As interest rates rise, bond prices fall.
- The F Fund returns will move up and down with the returns in the bond market. During periods of rising rates, the F fund can experience losses. During periods of falling interest rates, when the prices of bonds are rising, the F fund will experience gains.
- Offers the opportunity for increased rates of return relative to the G Fund over the long term, especially in periods of generally declining interest rates.

C Fund General Info

- The C Fund must be invested in a portfolio designed to replicate the performance of an index that includes common stocks; the Board has chosen the S&P 500 index.
- The objective of the C Fund is to match the performance of the S&P 500 index.
- As prices of the stocks of the companies in the S&P 500 index rise and fall, the S&P 500 index and C Fund returns will rise and fall.
- Fund works to diversify investments and to earn relatively high investment returns that stocks can provide over the long term, while lessening the effect of poor performance of an individual stock or industry.

S Fund General Information

- The S Fund must be invested in a portfolio designed to replicate the performance of an index that includes common stocks excluding the stocks that are held in the C Fund.
- The objective of the S Fund is to match the performance of the Wilshire 4500 index. The Wilshire 4500 index is the broadest measure of the domestic stock markets that excludes the companies held in the S&P 500 index and represents approximately 21% of the market capitalization.
- As prices of the stocks of the companies in the Wilshire 4500 index rise and fall the S Fund returns will rise and fall.
- Fund works to diversify investments and to earn relatively high investment returns that stocks can provide over the long term, while lessening the effect of poor performance of an individual stock or industry.

I Fund General Information

- The I Fund must be invested in a portfolio designed to track the performance of an index that includes common stocks the aggregate market value of which represents the international equity markets, excluding the U.S. equity markets.
- The objective of the I Fund is to match the performance of the (Europe, Australia, Asia, and Far East) EAFE index tracks the overall performance of the major companies and industries in the European, Australian, and Asian stock markets.
- As prices of the stocks of the companies in the EAFE index rise and fall, and the value of the U.S. dollar fluctuates relative to the value of the currencies of the countries represented in the EAFE index the I Fund will rise and fall.
- Fund works to diversify investments and to earn relatively high investment returns that stocks can provide over the long term, while lessening the effect of poor performance of an individual stock or industry

Other Required Forms

Important Information About Designating a Beneficiary

Members of the uniformed services who elect to participate in the Thrift Savings Plan open season **should not** submit Form TSP-U-3, Designation of Beneficiary, until they receive confirmation that a TSP account has been established for them. New participants will be sent a New Account Letter from the TSP record keeper shortly after the first TSP contribution is received from the member's service.

Forms received by the record keeper before the account is established will be rejected.

Form TSP-U-50, Investment Allocation, Not Available on the TSP Web Site

Form TSP-U-50, Investment Allocation, is the only TSP form that is **not available** from the TSP Web site. This is because the form was designed to be read by an optical scanner; if it were downloaded from the Web, this might not be possible. You can obtain a copy from your agency personnel office, or, if you are separated from Federal service, from the TSP Service Office. Alternatively, if you go to Account Access on this Web site, you can request a contribution allocation and/or IFT electronically.
